## Vilius Bučinskas, Software Developer

I am an ICT & Software Engineering graduate from Fontys University of Applied Sciences with a strong foundation in developing software applications using modern technologies.

I am a highly motivated, quick learner driven to continuously improve and stay up-to-date with the latest technologies. I possess strong communication and collaboration skills and I am able to work effectively in a team-oriented environment. Seeking a position in Software, Mobile, or Web Development to utilize my technical skills and knowledge to contribute to the development of innovative software solutions.

### Details

Nationality Lithuanian Date of birth 1999-01-19

### Education

#### Bachelor of Science, ICT & Software Engineering, Fontys University of Applied Sciences

September 2018 — February 2023

Major: Software Engineering

Minor: Mobile Development

### Internships

#### Software Developer at Signify N.V., Eindhoven

August 2022 — February 2023

Working with a world-leading lighting IoT (Internet of Things) company. Designed and developed a script that runs on a Hue Bridge (a smart home lighting system) and enables 3rd party developers to create automation & accessory behaviors through a REST API.

Skills: System Architecture JavaScript/TypeScript Docker Linux based systems Git Jest
